

DPG Foliar - 1800

Foliar Spray

GENERAL INFORMATION:

DPG Foliar - 1800 is a highly effective, concentrated source of nutrients, micronutrients and other special additives that enhance nutrient uptake, maintains the nutrients on the crop for extended periods of time. The high levels of calcium, zinc and boron aid in development of the crop, improve fruit set, and the development of the fruit and crop. In addition to these critical nutrients, the unique formulation contains nitrogen, magnesium and several trace elements that aid in the development of strong and healthy, nut, fruit and citrus trees, as well as, grape vines. DPG Foliar - 1800 delivers and maintains high levels of all these nutrients and micronutrients to the crop during the critical post bloom and developmental stage as one single product. No mixing of any other products is required. In addition, the product is unaffected by dilution in the spray tank so there is no interaction with the water used in diluting the DPG Foliar - 1800 in the spray tank. As a result of this unique formulation, this easy to apply foliar spray has no chlorides, carbonates or sulfates. Everything contained in the product can be utilized by the plant.

WARRANTY:

When using this product, conditions can vary substantially due to crop type, soil, weather and other conditions beyond Deerpoint Group's control. Deerpoint Group, Inc. makes no warranty of any kind concerning the application or use of this product. The user assumes all risk of handling suggestions.

CAUTION:

Concentrated DPG Foliar - 1800 should not be admixed with other fertilizers, micronutrients or other materials and could cause plugging when added to the spray tank mix. Avoid applying product when crops are suffering from moisture stress. If there is any concern, apply the diluted spray solution to a small test area of the foliage to assess any undesirable effects before application. Contact your Deerpoint representative for compatibility information.

CAUTION! This product contains >0.1% Boron (as B). The use of this fertilizing material on any crops other than almonds may result in serious injury to the crop(s).

CAUTION! The application of fertilizing materials containing molybdenum (as Mo) may result in forage crops containing levels of molybdenum (as Mo) which are toxic to ruminant animals

MINIMUM GUARANTEED ANALYSIS:

Total Nitrogen (as N).....	1.77%
1.77% Nitrate Nitrogen	
Soluble Potash (as K ₂ O)	3.59%
Calcium (as Ca).....	2.53%
Magnesium (as Mg).....	0.45%
Zinc (as Zn).....	0.26%
Manganese (as Mn).....	0.22%
Iron (as Fe).....	0.20%
Boron (as B).....	0.08%
Copper (as Cu).....	0.0089%
Cobalt (as Co).....	0.0013%
Molybdenum (as Mo).....	0.0013%

DIRECTIONS FOR USE:

DPG Foliar - 1800 can be used on most tree and vine crops to meet post bloom requirements to obtain a substantial and enhanced fruit. For nut and fruit trees this application includes: almond, pistachio, citrus, walnut and olive trees. For vines this application includes: grapes and kiwi. DPG Foliar - 1800 is designed to be diluted in water. Because the formulation is already buffered, no pH adjustment is required. Application rates and dilution factors depend on the particular crop sensitivity, the nutrients required, the amount of foliage that needs to be sprayed with and the method of application. When mixing if the water is added at a sufficient rate to insure good mixing no further mixing is require otherwise mix the content of the spray tank.

Nut and Stone Fruit Trees:

2-8 gal/100 gal post-bloom. Repeat at intervals as required by conditions.

Vine Crops:

2-8 gal/100 gal post-bloom and continue while active foliage is available at intervals as required by conditions.

Row Crops:

2-6 gal/100 gal beginning at 5th leaf stage and continuing at 7-14 day intervals.

Transplant Seedling:

1-5 gal/100 gal beginning at 2nd leaf stage and continuing at 5-7 day intervals until field planted.

Ornamental Trees & Shrubs:

2-8 gal/100 gal applied at 10-15 day intervals throughout the season.
