

DPG M·TEK Boron Ultra Micronutrient

(0-0-22-5.0 B)

GENERAL INFORMATION:

DPG M·TEK Boron Ultra is a concentrated source of nutrients: potassium (22.0% as K₂O) and boron (5.0% as B) that can be used to provide readily available high levels of potassium and boron to all types of crops including vegetables, vines, nuts and fruits. The formulation delivers and maintains high levels of potassium and boron in the soil that is readily available for uptake by the crop and is not tied up in the soil, under either acidic or basic conditions. As a result of this unique formulation, this easy to apply micronutrient has no chlorides, carbonates or sulfates. Everything contained in the product is utilized in the soil to promote microbial activity and available for uptake into the plant.

WARRANTY:

When using this product, conditions can vary substantially due to crop type, soil, weather and other conditions beyond Deerpoint Group's control. Deerpoint Group, Inc. makes no warranty of any kind concerning the application or use of this product. The user assumes all risk of handling and using this product whether or not in accordance with directions and/or suggestions.

CAUTION:

Concentrated DPG M·TEK Boron Ultra should not be admixed with other fertilizers, micronutrients or other materials and could cause plugging when added to the irrigation system together with other types of fertilizers and chemicals. Contact your Deerpoint representative for compatibility information.

CAUTION! This product contains >0.1% Boron (as B). The use of this fertilizing material on any crops other than almonds may result in serious injury to the crop(s).

MINIMUM GUARANTEED ANALYSIS:

Soluble Potash (as K₂O).....22.0%
Boron (as B).....5.0%

11.99 lbs. per gal @ 68 deg. F

DIRECTIONS FOR USE:

DPG M·TEK Boron Ultra can be used on most tree, vine and row crops to meet early season, and continued demand. For nut and fruit trees this application includes: almond, pistachio, citrus, walnut, olive and avocado trees. For vines this application includes: grapes and kiwi. For row crops this application includes: vegetables such as onions, tomatoes, peppers, and carrots, and melons, and berries.

Application Rates for Fertigation:

Orchards and Vineyards: Apply 0.5 to 3 gallons per acre for either surface or subsurface irrigation. Optimum results are obtained by injection of the DPG M·TEK Boron Ultra during the full irrigation set (start injection 1 hour after starting the irrigation, and stop half an hour before the end of the irrigation set).

Row crops: Apply 0.1 to 1.0 gallons per acre for either surface or subsurface irrigation. Optimum results are obtained by injection of the DPG M·TEK Boron Ultra during the full irrigation set (start injection 1 hour after starting the irrigation, and stop half an hour before the end of the irrigation set).

Soil Application Rates:

DPG M·TEK Boron Ultra can also be used as a pre-plant for soils deficient in boron or be side/top dressed for crops that do not have drip or subsurface irrigation. For these applications the DPG M·TEK Boron Ultra should be diluted to make sure an even distribution of the product is obtained. Contact your Deerpoint representative for recommendations regarding the amount to be applied.
