

DPG POTASSIUM PLUS

(0-0-42)

GENERAL INFORMATION:

DPG Potassium Plus is a highly concentrated source of potassium (42% as K₂O) that can be used to provide readily available potassium to all types of crops including: nuts, vegetables and fruits. The formulation contains very high levels of soil-beneficial carbon-based, organic material (40%). As a result, this easy to apply, unique formulation has no extraneous chlorides, carbonates or sulfates. So everything contained in the formulation is either utilized in the soil or available for uptake into the plant.

WARRANTY:

When using this product, conditions can vary substantially due to crop type, soil, weather and other conditions beyond Deerpoint Group's control, therefore, neither Deerpoint Group, Inc. nor the Seller makes a warranty of any kind concerning the application or use of this product. The user assumes all risk of handling and using this product whether or not in accordance with directions and/or suggestions.

CAUTION:

Concentrated DPG Potassium Plus is not designed to be admixed with other fertilizers and could cause plugging when added to the irrigation system together with other types of fertilizers. Contact your Deerpoint representative for compatibility information.

DIRECTIONS FOR USE:

DPG Potassium Plus can be used on most tree, vine and row crops to meet early season, and continued demand for potassium. For nut and fruit trees this application includes: almond, pistachio, citrus, walnut, olive and avocado trees. For vines this application includes: grapes and kiwi. For row crops this application includes: vegetables such as onions, tomatoes, peppers, and carrots, and melons, and berries.

Application Rates for Fertigation:

Orchards and Vineyards: Apply 2 to 8 gallons per acre for either surface or subsurface irrigation. Optimum results are obtained by injection of the DPG Potassium Plus during the full irrigation set (start injection 1 hour after starting the irrigation, and stop half an hour before the end of the irrigation set).

Row crops: Apply 1 to 5 gallons per acre for either surface or subsurface irrigation. Optimum results are obtained by injection of the DPG Potassium Plus during the full irrigation set (start injection 1 hour after starting the irrigation, and stop half an hour before the end of the irrigation set).

Soil Application Rates:

DPG Potassium Plus can also be used as a pre-plant for soils deficient in potassium or be side/top dressed for crops that do not have drip or subsurface irrigation. For these applications the DPG Potassium Plus should be diluted to make sure an even distribution of the product is obtained. Contact your Deerpoint representative for recommendations regarding the amount to be applied.
